Head for the Country with Affluent Forests for Our Secure and Fulfilled Lives

National Land Afforestation Drive

Forests are the home of plant ecosystem and water that are essential to the existence of each and every living thing. They provide our lives with unlimited blessings and benefits. These include enrichment of water resources, conservation of national land, prevention of global warming, provision of services for health and recreation, and production of timber.

Recently, in addition to above services, the people of Japan want to solve global issues such as accomplishment of SDGs and realization of carbon neutrality. Therefore, there are an increasing number of expectations for various roles of forests.

With the afforestation drive, we promote tree planting and greening activities in forest lands, which could be considered as common properties of mankind, in the form of wide-ranging civic initiatives all over the country and across the borders. Thereby, we contribute to the realization of lifestyles rich in spirit, cultural progress for the country of Japan, and conservation of the global environment.

National Land Afforestation Promotion Organization

The National Land Afforestation Promotion Organization (NALAPO) was originally established as the National Greening Promotion Committee in January 1950 and served as the core organization to boost the national afforestation drive in the form of civic initiatives, with diversified participation from all spheres and levels of the Japanese society. In September 1967, the committee was incorporated. In March 1988, it set up the Funds for Forests and Water and was renamed to NALAPO. In July 2011, the organization undertook a fresh beginning with new status as a Public Service Corporation under the new public service organization system.

The Speaker of the House of Representatives and the President of the House of Councilors serve respectively as the President and the Supreme Advisor of the organization. The Representative Director is Dr. Junichi Hamada, former President of the University of Tokyo, and NALAPO is composed of 82 regular member organizations with voting rights at the General Assembly, and further 47 supporting member organizations as of March 2024. Among the regular members are 47 Prefectural Greening Promotion Committees, which promote afforestation in respective prefectures.

An Extract from Articles of Incorporation of the National Land Afforestation Promotion Organization

Article 3 Objectives

This corporation aims, with the national afforestation drive, to establish forest resources, to conserve national land, to cultivate water resources and to plant trees in living environments. Thereby, it intends to enrich the lifestyles of Japanese citizens, to advance the Japanese culture and to conserve the global environment for its international contributions.

Greenery Festivals

■ National Tree Planting Festival

National Tree Planting Festival is held with the participation of people from the whole country in each spring, as a core event of the national land afforestation drive. The festival is attended by Their Majesties the Emperor and Empress of Japan.

Their Majesties plant seedlings and sow seeds by hand alongside other participants. Planted seeds are nurtured carefully and grown trees will be transplanted on public land.

■ National Tree Care Festival

The National Tree Care Festival is held in each autumn to raise awareness that sufficient protection and caring activities are necessary for healthy forests. It is attended by Their Imperial Highnesses the Crown Prince and Crown Princess of Japan.

(Ibaraki Prefecture)

46th National Tree Care Festival
(Ibaraki Prefecture)

National Land Afforestation Campaign

■ National Afforestation Campaign

The National Afforestation Campaigns are carried out from January through May, with afforestation awareness programs, fundraising events for the Greenery Donation Funds and various PR activities jointly. Those aim to enhance interest in the national afforestation drive among the people at large and to appeal for their participation in the “Afforestation by Public Partnership” movement.

Many people participate in afforestation events and come in touch with trees and forests firsthand. Those events are held all over the country from southern regions to northern districts accompanying development of new green leaves in spring.

Fundraising Campaign

■ Greenery Day and Greenery Month

May 4 is Greenery Day, a Japanese public holiday, when people are expected to enjoy activities in nature and give thanks for the blessings of nature while enriching their minds with those experiences.

April 15 to May 14 is also designated as Greenery Month and various events focusing on greenery and forests are held throughout Japan. In Tokyo, the Green Thanksgiving Ceremony is attended by a member of the Imperial Family of Japan.

National Land Afforestation Campaign

■ Commendation for Distinguished Service in Afforestation

The National Land Afforestation Promotion Organization holds a wide range of competitions relating to afforestation promotion to recognize outstanding cases publicly and commends persons for their distinguished service over many years in afforestation.

- Green Culture Award
- Awards for Persons with Distinguished Service in Afforestation
- National Afforestation Campaign/Tree-care Campaign Slogan Competition
- National Afforestation Campaign/ Tree-care Campaign Poster Competition
- National Tree-care Initiatives Competition
- Awards for Municipalities with Superb Outcomes in Afforestation with Public Participation
- National Presentation Event for Green Scouts Activities
- Awards for Green Scouts with Distinguished Activities
- Awards for Persons with Distinguished Services to Foster Green Scouts
- National School Afforestation Competition (Activities in School Forests, and Greening of School Environment)

Outstanding Works from Slogan/Poster Competition

Afforestation by Public Partnership

■ Greenery Donation Funds

Green Feather Fundraising activities started as a symbol of National Land Afforestation Drive in 1950. In 1995, to commemorate 50 years since the end of World War II, the Greenery Donation Act was enacted, and the funds were renamed Greenery Donation Funds.

The Funds are important tools for the Afforestation by Public Partnership drive and link contributors in cities to volunteers working in forests.

Money contributed to the Greenery Donation Funds is used for afforestation activities by volunteer groups. Those activities include conservation of biodiversity, childhood education in forests, contribution to SDGs and realization of Carbon Neutrality.

● Various Ways for Donation

Anybody can contribute to the Greenery Donation Funds by various ways such as donation boxes on checkout counters in supermarkets or convenience stores, purchase of goods with donation, vending machines for charity and fund-raising on the Internet(on-line transfer) as well as in the neighborhood or schools.

As mobile payment is getting popularity, NALAPO also started to use applications for smartphone in its fund-raising activities.

Afforestation by Public Partnership

Funds for Forests and Water

In March 1988, the Funds for Forests and Water (current name since July 1, 2011) has been deployed for Afforestation by Public Partnership movement.

Profits from the Funds are used for public awareness activities to facilitate participation of people in forest-related activities, surveys and research on public functions of woodlands including relationship between forests and water, and international exchange related to afforestation promotion. These initiatives aim to develop an understanding on afforestation and obtain cooperation by public.

International Exchange of Highschool Students Major in Forestry (Indonesia)

Green Scouts

The Green Scouts have been established to nurture the spirit and will to love, protect and foster greenery through activities in forests among children, who will be next leaders in afforestation movements. The National Green Scouts Federation (as of January 1, 2024) consists of 3,071 organizations with over 320,000 members.

The Green Scouts are actively engaged in activities such as interactive nature experiences in forests, public service activities, camping and other recreational activities, making use of various regional characteristics. Activity presentations and exchange meetings by Green Scouts members selected nationwide, and Green Scouts leaders training sessions are held to encourage Green Scouts and to promote autonomous activities by them.

Afforestation by Public Partnership

Support for Afforestation from SDGs-conscious Corporations and NPOs

Expansion of Afforestation by Public Partnership movement supported by general citizens rather than by only people working in forests and environment areas will contribute to realization of SDGs effectively.

Therefore, NALAPO tries to disseminate Four Actions for Forests, namely Touch Forests, Use Wood, Support Forests and Live in Forests. It also provides information on forest volunteer activities to support afforestation activities by corporation and NPOs.

Benefits from Forest Eco-System and Afforestation Drive

'Forest-related Service Industry' utilizes services from forest eco-system in diverse fields such as health promotion, tourism and education multiply. NALAPO supports the industry by implementation of research projects, provision of information and hosting of exchange meetings to increase numbers of visitors in forest areas and to promote their understanding of afforestation drive.
